SUMMARY

B.Tech CSE (AI/ML) student building production full-stack systems with React, Node.js, and PostgreSQL. Currently interning at BeRam Drones as a Full Stack Developer Intern.

EDUCATION

Ramdeobaba University <i>B.Tech in Computer Science – AI & ML Specialization</i> CGPA: 8.01/10	Nagpur, India Aug. 2024 – May 2028
St. Paul Public School and Junior College <i>HSC – Science</i>	Nagpur, India 2022 – 2024

EXPERIENCE

Full Stack Developer Assistant Intern BeRam Drones — Nagpur, India (On-site) - Built end-to-end authentication and account infrastructure including email delivery and background job handling for two production SaaS products, used daily by real users. - Designed and shipped the complete frontend and backend for a management platform, turning UX research into a responsive, production ready interface.	June 2026 – Present
Content Writer Intern Cop&Drop — Bangalore (Remote) Wrote over 90+ SEO-optimized blogs from keyword research, contributing to a 10% increase in audience reach across multi-platform content strategies.	Dec. 2025 – Present

PROJECTS

AeroKeep Inventory Management System Live GitHub React, Node.js, Express, PostgreSQL, Prisma - Developed a full-stack inventory management system with JWT authentication and role based access control at a defense tech startup, building 14 REST API endpoints across 4 relational data models with atomic stock updates via database transactions. - Implemented 5 core inventory features like CRUD, stock tracking, barcode scanning, CSV export, and real time low stock alerts covering the full engineer to admin workflow.	June 2026
SevaLog Proof of Work Platform for Informal Workers Live GitHub React, TypeScript, Supabase, PostgreSQL - Architected a full-stack digital verification platform with role-based access control across 3 actor types — Worker, Employer, and Verifier — backed by a hash-chain audit log and trust score algorithm for tamper-proof credibility records. - Integrated automated SMS alert pipelines, reducing manual verification update latency by 60% in testing workflows.	Mar. 2026
Kyro Panel Coordinated AI Voice Interview Panel Live GitHub Demo TypeScript, Node.js, Express, PostgreSQL, Agora RTC - Built the real-time Agora RTC voice pipeline integrating Deepgram nova-3 ASR and MiniMax neural voice switching, enabling three AI interviewer personas to speak over a single low-latency audio stream. - Developed the live deliberation room UI and post-interview scorecard dashboard for a multi-agent panel built with a teammate.	2026

TECHNICAL SKILLS

Languages: Python, Java, C, JavaScript, TypeScript, SQL
Frontend: React, Next.js, Tailwind CSS, Vite, Zustand, TanStack Query
Backend & Databases: Node.js, Express.js, FastAPI, Prisma ORM, PostgreSQL, Supabase, Redis, REST APIs
Developer Tools & Platforms: Git, GitHub, Docker, Vercel, Google Cloud, Render
Domains: Machine Learning, IoT, Full-Stack Development, JWT Authentication

CERTIFICATIONS

Engineer AI Agents with Agent Development Kit (ADK) <i>Google · View Credential</i>	May 2026
Google Cloud Career Launchpad – Computing Foundations <i>Google Cloud Learning Services Credential ID: BMMzipJZ</i>	Apr. 2026

ACHIEVEMENTS

3rd Prize — MEDHA Medithon 2026 National Hackathon (700+ teams) VNIT Nagpur & BETiC-IIT Bombay Built SureStep, an offline-first mobile app that standardizes clubfoot (CTEV) assessment using on-device computer vision, presented to and evaluated by practicing surgeons and biomedical mentors.	August 2026
